

Self Storage Construction

From single level drive up facilities to multi-level facilities, here at G&M Stor-More we can help you design a facility that allows you to Stor-More!

We can design, engineer and construct a brand new facility or a conversion of an existing building.

Our storage facilities are build to the highest quality of construction using only quality Australian materials. Our facilities come standard with many quality inclusions, we also offer a range of optional extras.

Standard Inclusions

- White corridor panels and channels
- Colorbond® roller or swing doors
- Self-storage locks with over locking facility
- Aluminium corner guards on all exposed corners
- Safeguard internal wall sheeting

Options

- Hardwood buffer rails to protect the walls of your facility
- Your company's corporate colours can be incorporated into the design
- Mesh for internal security between units
- Zinc ceiling sheets for added security and strength
- Ceiling and lighting systems available

We'll help you stor-more.
