

## Wine Storage

Increasing in popularity, we have two options for wine lockers. The first is a free standing 1 meter cube locker that can be fixed individually or in banks and can be relocated with ease. The second is a customized locker which can be adapted in size and wall mounted.

Both options of our wine lockers are made of entirely steel components and have perforated shelving which is the best option for a fungi free climate controlled environment required for wine storage.

*We'll help you stor-more.*
